

NITIN JANGID

Data Scientist

Udaipur, Rajasthan | jangidnitin282006@gmail.com | +91-9351921427

GitHub: github.com/jangidnitin28 | LinkedIn: linkedin.com/in/nitin-jangid-9a54a1326

PROFESSIONAL SUMMARY

Aspiring Data Scientist with a strong foundation in Python, Machine Learning, and statistical analysis. Passionate about building predictive models, uncovering actionable insights from complex datasets, and translating data into meaningful decisions. Experienced in developing end-to-end ML pipelines, data visualization, and deploying AI-driven applications. Committed to continuous learning and solving real-world challenges through data.

EDUCATION

B.Tech — Computer Science & Engineering | *Rajasthan Technical University, Kota* 2024 – 2028

- Current CGPA: 7.8 / 10

12th — Science (PCM) | *GNPS, Udaipur, Rajasthan* 2024

- Percentage: 81%

10th | *GNPS, Udaipur, Rajasthan* 2022

- Percentage: 83%

TECHNICAL SKILLS

Languages: Python, SQL, Java

ML / AI: Machine Learning, Deep Learning, Scikit-learn, TensorFlow

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Excel

Visualization: Power BI, Tableau

Web / API: React, HTML5, CSS3, Tailwind CSS, FastAPI

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle

PROJECTS

Heart Attack Risk Prediction System | *ML Project — Python, Scikit-learn, FastAPI* Jan 2026 – Feb 2026

- Built an end-to-end ML pipeline using clinical data (age, cholesterol, BP, ECG, chest pain) to predict heart attack risk with **91.4% accuracy**.
- Applied Logistic Regression, Random Forest, and XGBoost; tuned hyperparameters achieving AUC-ROC of 0.94.
- Performed EDA using Seaborn & Matplotlib — identified key risk factors through correlation heatmaps and feature importance analysis.
- Handled class imbalance with SMOTE; engineered 6+ new features (age group bins, BMI category, risk score) improving accuracy by ~4%.
- Deployed as a real-time prediction tool via FastAPI + React frontend with color-coded risk alerts.

Sales Analytics Dashboard | *Data Visualization Project — Python, SQL, Power BI* Nov 2025 – Dec 2025

- Processed and analyzed 50,000+ sales records using Pandas; wrote complex SQL queries for KPI extraction (revenue trends, YoY growth).
- Built interactive multi-page dashboard in Power BI with dynamic filters by region, product, and time period.

- Created charts and visualizations using Matplotlib & Seaborn for trend analysis and customer segmentation.

Developer Portfolio Website | *Web Project — React, Tailwind CSS*

June 2025 – July 2025

- Developed a fully responsive portfolio website with animated skill cards, project showcase, and contact form using React and Tailwind CSS.
- Implemented dark theme, smooth scroll animations, SPA navigation with React Router; deployed on GitHub Pages.

CERTIFICATIONS

- **Machine Learning Specialization** — Coursera
- **Programming in Java** — NPTEL
- **Data Science with Python** — Coursera / NPTEL
- **Deep Learning with TensorFlow** — Kaggle / Udemy
- **SQL for Data Analysis** — HackerRank (5-Star Gold Badge)

PROBLEM SOLVING & COMPETITIVE PROGRAMMING

- Solved 250+ coding problems across **LeetCode** and **GeeksforGeeks** covering Data Structures, Algorithms, and Dynamic Programming.
- Topics covered: Arrays, Linked Lists, Trees, Graphs, Sorting, Recursion, Hashing, and Dynamic Programming.
- Active on Kaggle — participated in ML competitions; exploring datasets for hands-on model building practice.

ADDITIONAL INFORMATION

- **Languages:** Hindi (Native) | English (Professional)
 - **Soft Skills:** Analytical Thinking, Attention to Detail, Fast Learner, Team Collaboration, Problem Solving
 - **Interests:** Data Science Research, AI/ML Trends, Open Source Contribution, Mathematics & Statistics
 - **GitHub Activity:** 150+ commits across personal Data Science and Web Development projects
-
